Nevsky Shipbuilding - Shiprepair Plant, LLC

PRESS-RELEASE

July 29th, 2010

NEVSKY SHIPYARD starts the campaign on choosing the suppliers.

«Nevsky Shipbuilding-Shiprepair Plant» starts the campaign on choosing the equipment and materials **for the construction of a universal dry-cargo vessel deadweight 7000 tons of project RSD49**

(According to classification of «Marine Engineering Bureau», the developer of the project, the vessel will have the following class: «Volgo-Don-max class»)

All the interested suppliers are invited to participate in tenders. The following requirements and rules are to be observed.

The brief information regarding the inquiries about deliveries is posted on the website of the Shipyard www.nssz.ru in section "Procurement". Preliminary from 7/30/2010 (we ask you kindly to follow the new information there).

Simultaneously detailed inquiries about delivery including all the necessary requirements to the commercial offer with Basic Specifications and corresponding drawings are posted on portal www.supplynetwork.ru.

The Supplier prepares his biddings and posts them on portal www.supplynetwork.ru in accordance with the requirements specified in inquiry about delivery.

As soon as the Shipyard's engineers and specialists coordinate all the technical parameters and confirm the conformity of the submitted offers to the declared requirements, final commercial offers of suppliers are to be considered by Tender Board of the Shipyard together with the representatives of the Customer. The conclusion of the Tender Board is also to be posted on portal www.supplynetwork.ru.

The given procedure has already been practised for several months, and it makes the process of equipment purchasing as open as possible for possible participants.

For information: LLC « Nevsky Shipbuilding-Shiprepair Plant », subsidiary company of JSC «North-Western Shipping Company», which is a part of transport holding «Universal Cargo Logistics Holding», is located 40 km away from Saint-Petersburg in the town of Schliesselburg on the left bank of the river Neva. The shipyard is one of the oldest enterprises of water transport in the northwest of Russia which started its shipbuilding activity since 1952. Nowadays the shipyard builds sea and river vessels of various types and purposes and carries out ship repair works of all kinds. Slipway for rising of vessels of « Nevsky Shipbuilding-Shiprepair Plant » allows to launch and lift for repairs the vessels up to 140 meters long and dock weight up to 2500 tons.
